## PROFILE

---

Information Technology student at Madhuben & Bhanubhai Patel Institute of Technology with hands-on academic project experience in frontend development, Python programming, voice-to-voice translation, file handling, and secure file protection systems. Skilled in building clean, responsive, user-friendly interfaces and practical software solutions using HTML, CSS, JavaScript, and Python, with a growing interest in web development, security concepts, and real-world project implementation.

## EDUCATION

---

### B.Tech in Information Technology

Madhuben & Bhanubhai Patel Institute of Technology (MBIT),  
CVM, Gujarat  
Current CGPA: **8.51**

### Higher Secondary

New English School (NES), Nadiad, Gujarat  
Percentage: **54%**

### Secondary School

Mother Care, Nadiad, Gujarat  
Percentage: **76.33%**

## TECHNICAL SKILLS

---

- **Frontend:** HTML5, CSS3, responsive web design, Flexbox, Grid, animations
- **Programming Languages:** C, Python, JavaScript
- **Concepts:** DS, Data Analysis and Algorithms
- **Core Subjects:** Web Development, Python
- **Tools:** GitHub, VS Code
- **Soft Skills:** Teamwork, adaptability, continuous learning, problem solving

## PROJECTS

---

### Voice-to-Voice Translation System (*Python + Frontend UI + Speech Processing*)

- Developed a translation application designed to convert spoken input into translated voice output for multilingual communication.
- Added support for audio file upload and text file upload to translate different input formats in one project flow.
- Designed a user-friendly interface structure to make the translation process simple for academic demonstration and end users.
- Focused on practical speech processing, file handling, and clean frontend presentation for a complete project experience.

### Secure File Protection System (*INS + MFA + Encryption/Decryption*)

- Built a security-focused project based on Information and Network Security concepts to protect real user files.
- Implemented multi-factor authentication concepts to improve access control before file operations.
- Designed encryption and decryption functionality for multiple file types including audio, document, image, and text files.
- Improved file privacy and data protection workflow through authentication, secure file handling, and protected access logic.

## CERTIFICATIONS

---

- IBM SkillsBuild: AI Tutorial - Completed introductory learning on artificial intelligence concepts and applications.

## ACADEMIC ACTIVITIES

---

- Created and customized a professional dark-theme personal portfolio website using HTML, CSS, and JavaScript.
- Practiced frontend development through responsive layouts, animations, contact sections, and project showcase sections.
- Applied academic concepts from Information Technology, frontend development, Python programming, and information security in projects.
